Why Energy Smart Schools?

According to the United State Environmental Protection Agency and Department of Energy at www.energystar.gov

- Schools spend more on energy than any other expense except personnel.
- A high-performance school doesn't have to cost more to construct than a conventionally built school.
- High-performance schools can lower a school district's operating costs by up to 30%.
- Energy is one of the few expenses a school can reduce without sacrificing educational quality.
 - Schools are central to the communities they serve and should reflect community values – like energy and resource conservation.
 - Schools are a great place to teach the nation's children about energy and resource conservation.

For more information about ENERGY STAR schools in Kentucky or the School Energy Managers Project, contact the Department for Energy Development and Independence or the Kentucky School Boards Association.
